

# DIGITAL SARAWAK

**Harnessing Digitalisation for Sustainable Development**

# Digital Sarawak

**“By 2030, there will be no distinction between the digital economy and the economy”**

- Government services are data and citizen driven, efficient and secure with 100% online option
- Businesses are digitally driven business
- Sarawak has digitally literate society to maximise digital value
- Sarawak has a globally competitive technology sector
- Sarawak is cyber secure with vibrant digital environment fostering economic prosperity, social inclusivity and environmental sustainability

# POST COVID-19 DEVELOPMENT STRATEGY 2030 (PCDS 2030)

PCDS 2030 is driven by  
**Digital Transformation is  
the key enabler and catalyst  
to PCDS 2030**

Digital Economy, Green Economy  
and Circular Economy

# Why Sarawak Digital Economy Blueprint 2030?

- Key contributor to Post COVID-19 Development Strategy 2030
  - Increase productivity, improve efficiency and lower cost
  - Create high value jobs, increase household income
- Tap percentage of global GDP into Sarawak
- Accelerate digital investment (FDI & DDI) and public-private partnership
- New business models and access to global market
- **Accelerate ease of doing business in Sarawak**
- **Spur innovation and new generation of digital industry**
- **Foster inclusivity, wealth sharing & transparency**

# Economic Impact of Digitalisation

## Digital Assets

The value derived from digital technology assets & services – infrastructure, software, digital manufacturing (chips, devices, computes), etc.

## Digital Spillover

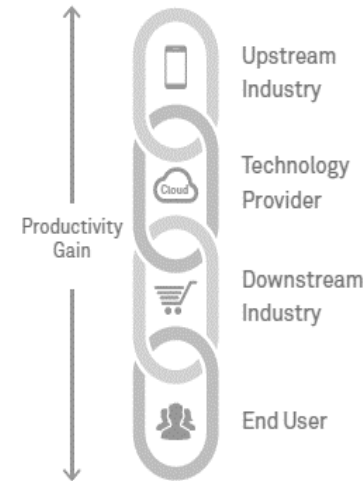

The "knock-on" benefits that follow on from digital investment, with productivity gains rippling across the economy

### Internal

Optimised technology investments applied throughout the operation

### Vertical

Transferring productivity gains in services across the entire supply chain

### Horizontal

Innovation by one company is emulated by others, leading to productivity gains across a sector

# What is for Sarawak?

## Developed State by 2030

### Society

Job opportunities and improved social wellbeing

High/semi-skilled jobs

All students & household with access to internet

Increase household income

Lower GINI Index

### Business

New business models and access to global market

Contribution to Sarawak GDP & productivity

New high-tech start-ups

Growth in Digital Investment

Digitalised MSMEs

### Government

Improved public service delivery

Secure online government services – Ease of Doing Business

Digitally literate civil servants

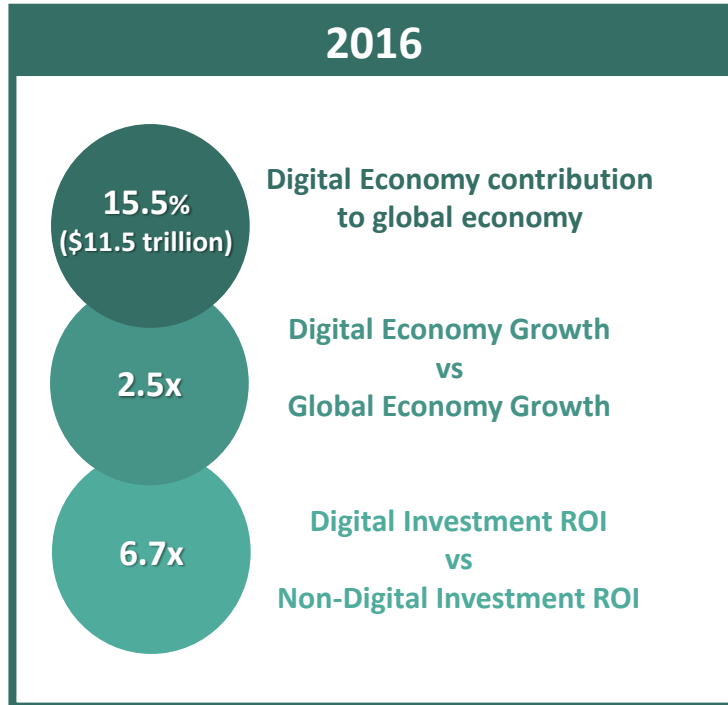

Cashless payment option offered by ministries & agencies

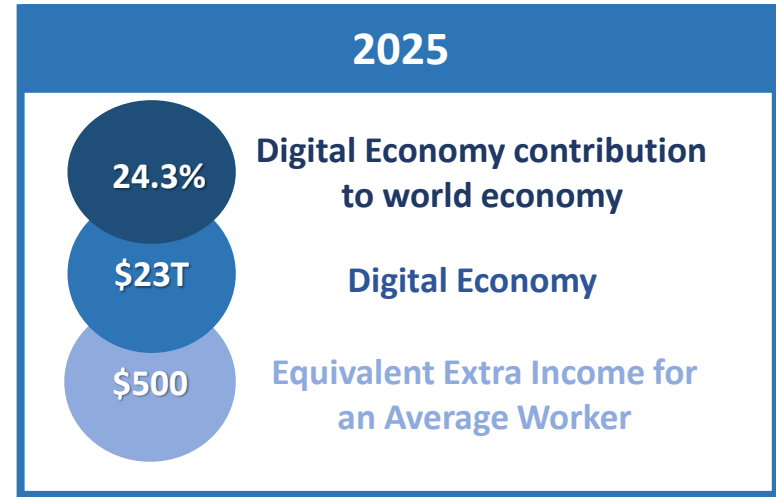

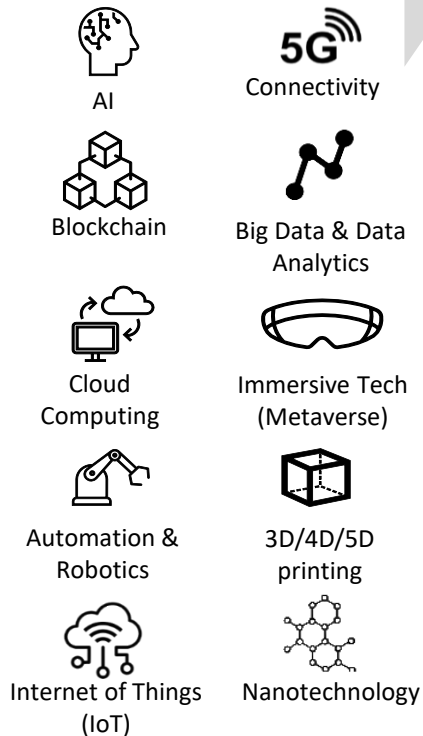

Enhanced data protection, privacy & security

# Digital Economy Trends

## Value of Digital Economy

From ICT to Frontier Technologies

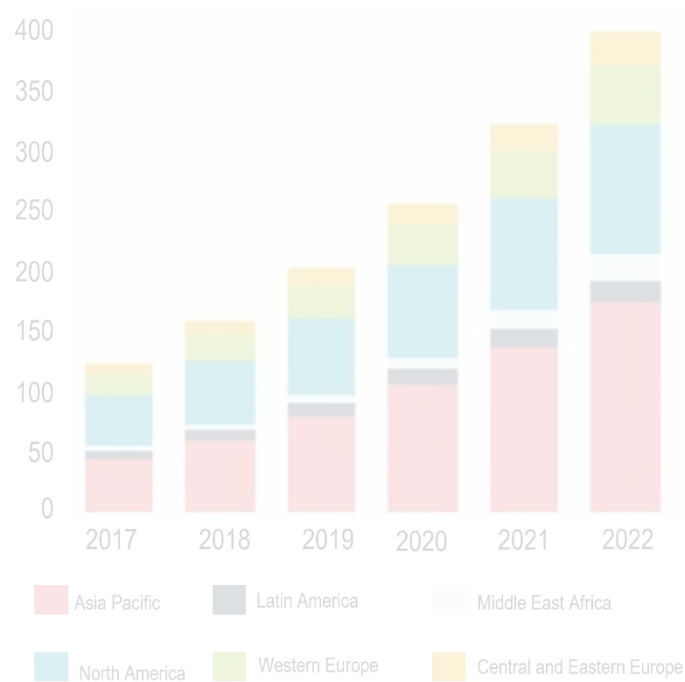

Digital Readiness Policies

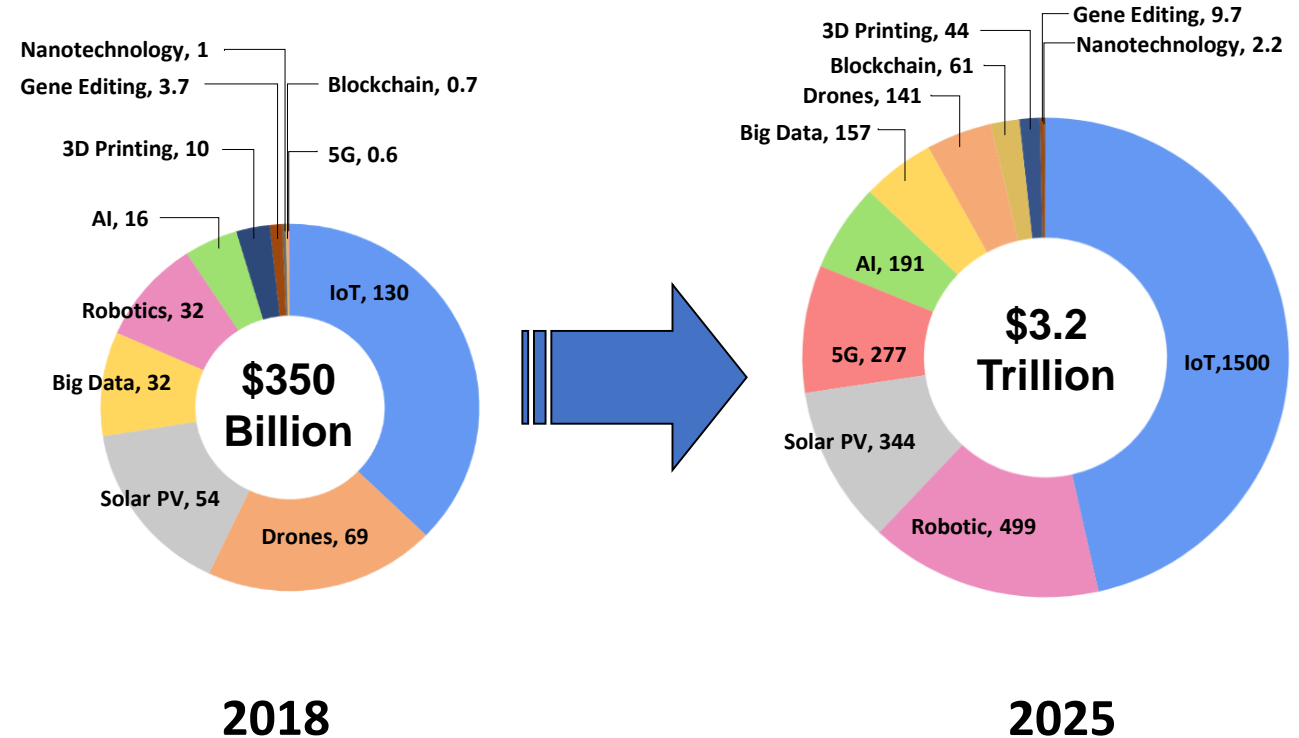

- Policies, Regulations and Digital Readiness to maximise digital value

# Digital Economy Trends

- Internet Protocol traffic has exceeded 400 Exabyte per month

## Frontier Technologies

- Cross-border data flows are a new international economic flow
- WEF estimates **85 million** jobs will be displaced and **97 million** new jobs will be created by 2025

# Sarawak Digital Economy Blueprint 2030

- **Moving Forward**
  - Foundation for the PCDS 2030
  - Builds on the SDE Strategy 2018-2022
  - Aligned with the Global and Malaysia Digital Economy Blueprints
  - Blueprint recognises that Government plays an enabling role
  - Focuses on growing the private sector economy
  - Targets on growing whole-of-society digital transformation
- **Vision**
  - Sarawak to be a ***“leading Digital Economy and Society by 2030”***
- **Mission**
  - Nurture integrated ecosystem to foster **inclusive digital society**
  - Build the right **foundations** to grow Digital Economy
  - Foster **business growth** and vibrant technology sector
  - Capitalise on **digital technologies** to maximise digital value
  - Deliver simple, secure and trusted **government services**

# Sarawak Digital Economy Blueprint 2030

## Built on five strategic pillars

- **Focusing on Economic Growth Priorities**
  - Accelerate digitalisation of economic sectors and data monetisation
  - Boosting economic competitiveness through digitalisation
- **Growing Digital Businesses**
  - Support and grow globally competitive and vibrant technology sector, investments, trade and start-ups & spin-ins
- **Transforming Public Sector & Services**
  - Deliver efficient, secure and trusted online services and improve ease of doing business
- **Adoption of Frontier Technologies**
  - Enable economy wide transformation to maximise digital value
- **Building the Foundation**
  - Accelerate **Digital Readiness** in infrastructure & connectivity, data governance & cyber security, digital talent & skills, research, innovation & entrepreneurship and inclusivity

The background is a solid blue color with a faint, semi-transparent image of a globe. In the lower portion of the image, there is a faint illustration of two hands holding a tablet computer. The text is centered in the upper-middle part of the image.

# **Growing Digital Business**

# Digital Investment

## • Geography of Digital Investment

## • ASEAN

- 662 mil population
- \$3.35 trillion GDP
- 70% internet users

## • Opportunities in Sarawak

Digital Services

Digital Infrastructure

Technology

Research & Talent

## • Key Drivers

- Visionary Leadership and committed Government
- Conducive policies and business environment
- International, national and local connectivity
- Utilities – green energy & abundance of water
- Cyber security maturity
- Domestic Data Centres
- Skilled local talent (free higher education)
- Tax incentives
- Lifestyle and Liveability

## • Digital Precinct/Park

- **InvestSarawak** - One stop Agency to accelerate investment

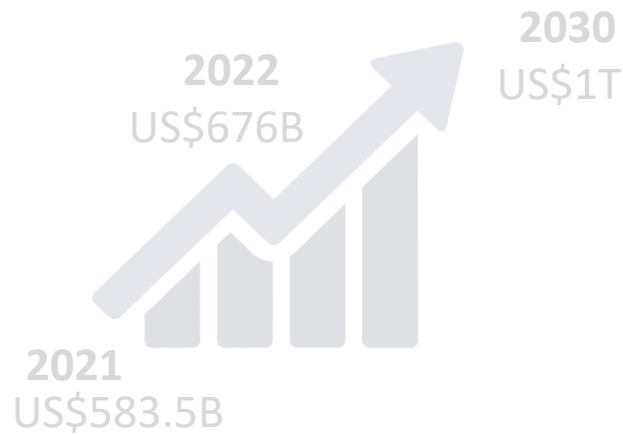

# Hyperscale Data Centres & High-Performance Computing

- Cross-border data flow
- High compute power
- High-speed connectivity
- Green energy
- Competitive electricity & water tariffs
- Skilled workforce
- Tax and other incentives

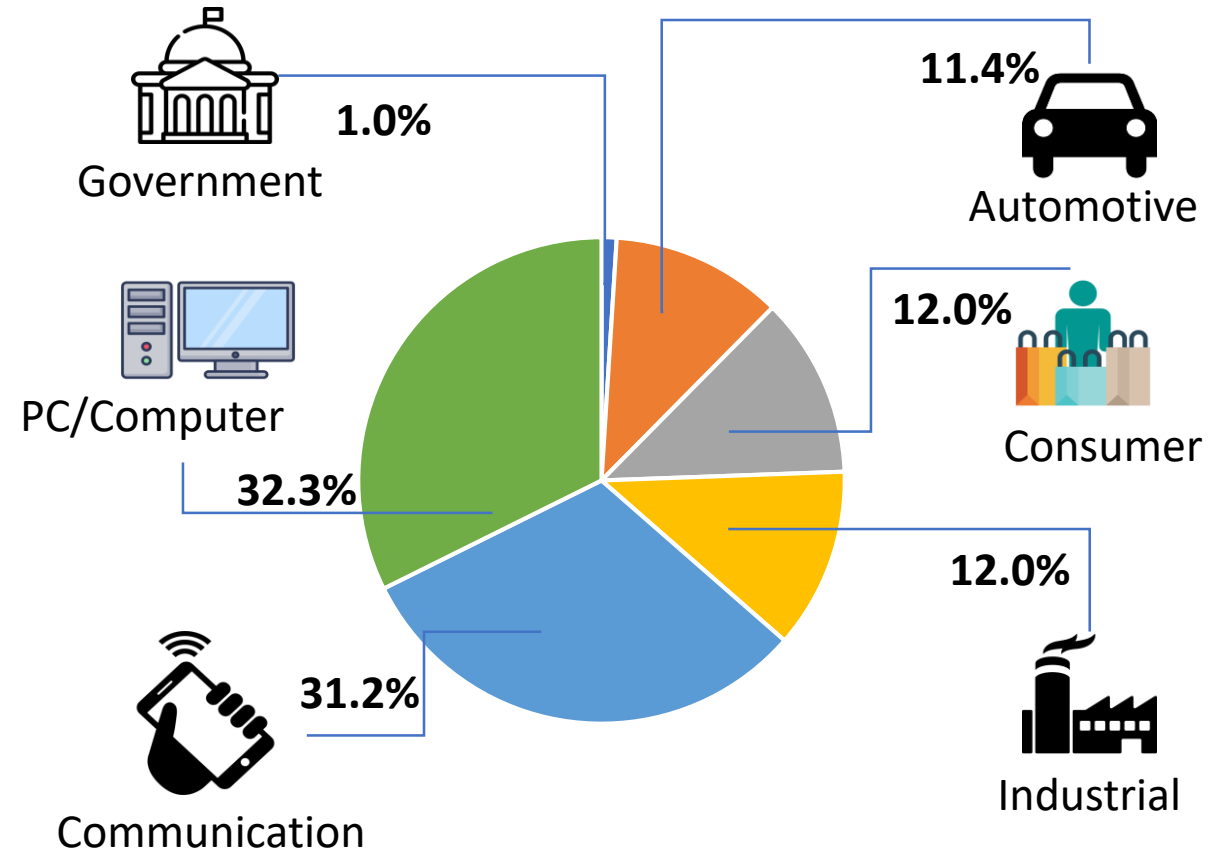

# Semiconductor Design

- Global semiconductor revenue

- Global microchip demand

**Microchips: RF, Analog and Mixed Signal, Digital, High Voltage, Sensors, MEMS/NEMS, Compound Semiconductor, etc**

# 5G Applications

Broadband and Media

Intelligent Transport System

Critical Services and Infrastructure

Critical Control of Remote Devices

Human Machine Interactions

Sensor Network

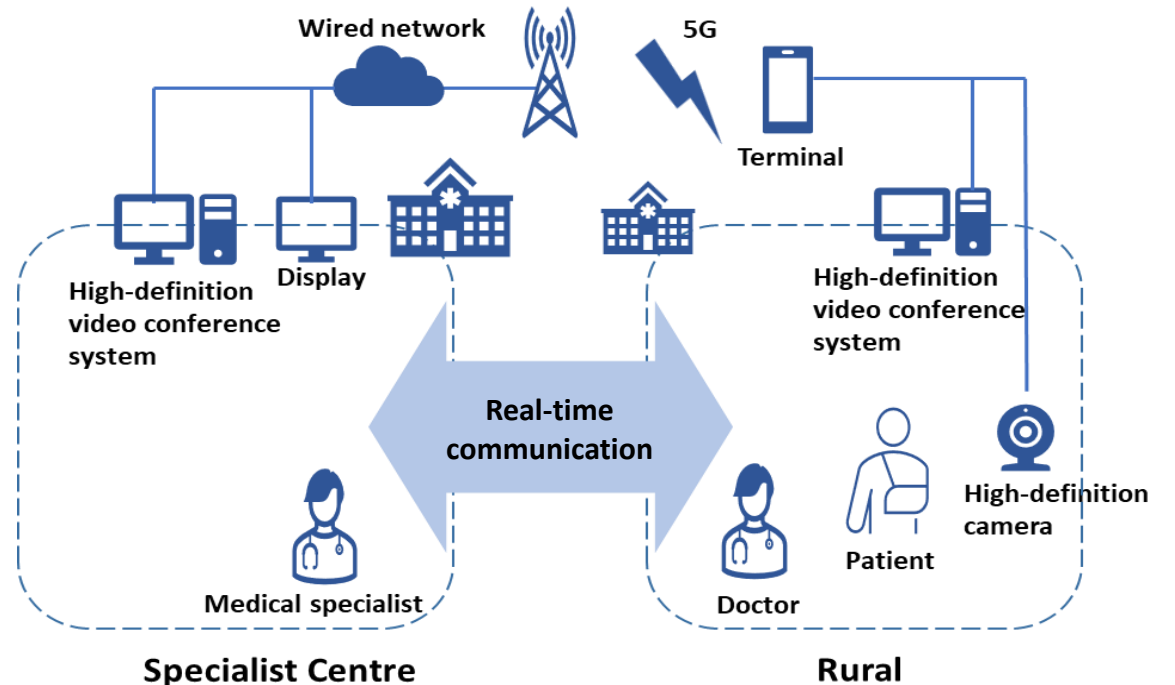

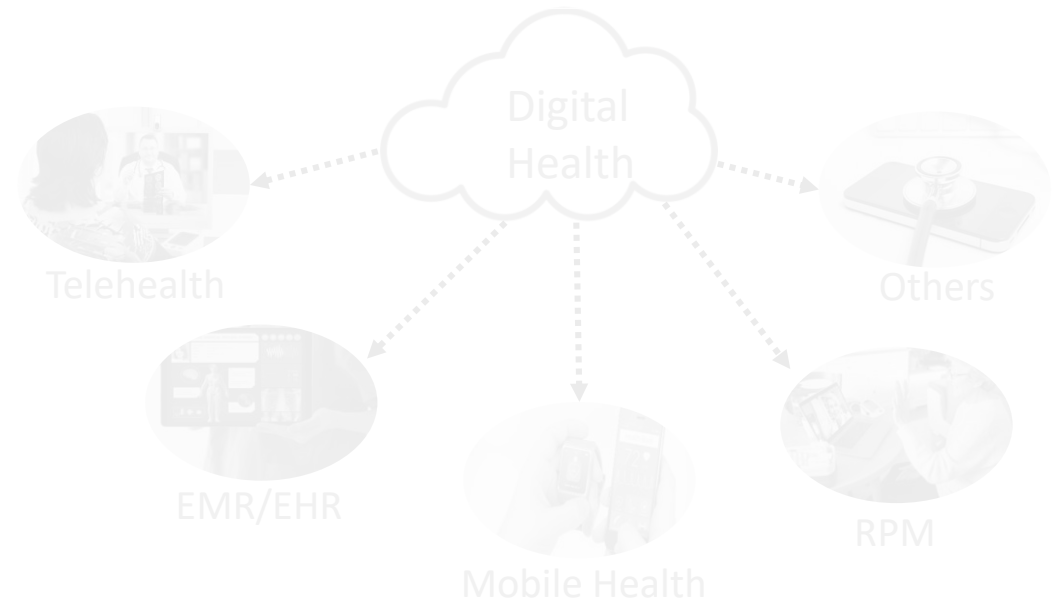

# Digital Health

## Key Areas

- **Telemedicine**
  - 65% of the global market
- **EMR/EHR**
  - Electronic Medical Record/Health Record
- **Mobile Health**
  - mHealth technology
- **Remote Patient Monitoring (RPM)**
  - Allow real-time data exchange

## Technology Enablers

- **Cloud Computing**
  - Efficient patient data management service model
- **AI**
  - Growing demand for value-based care, AI innovations
- **Blockchain**
  - Security
- **5G**
  - High-speed, low latency, high resolution
- **Immersive Technologies**
  - AR/Metaverse

# Smart Port

Leveraging innovative technologies and data-driven solutions to enhance operational efficiency, safety, and sustainability

- **Technologies**

- Robotics & Automation, 5G, IoT, AI, Digital Twin, etc.

- **Terminal Automation**

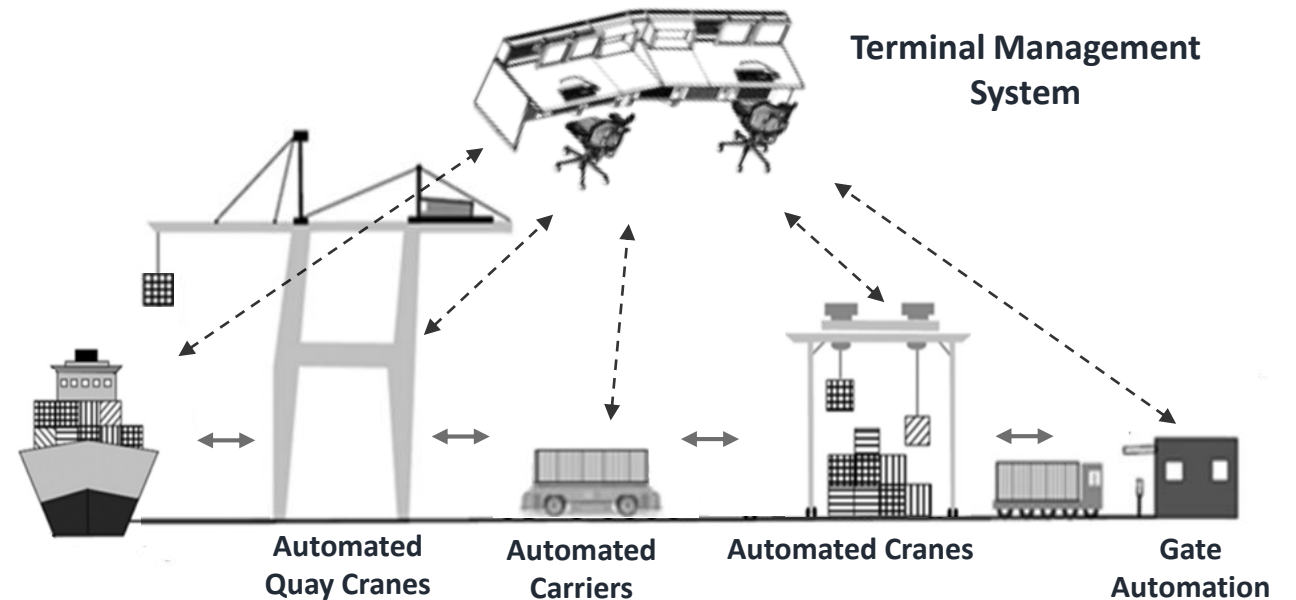

- Automated Ship-to Shore Crane
- Automated Quay Cranes - Cranes Control System
- Automated Guided Vehicles Communication Systems
- Terminal Management System

- **Onshore Operation**

- Data driven traffic management
- Automated port access
- Inventory management

- **Infrastructure Management**

- Predictive maintenance
- Data driven safety management

# Sustainable Energy Transition

## Digitalisation to expedite green economy transition

- **Digital Twins**
  - Modelling & optimising to maximise RoI and minimise risks
- **Modelling and Control**
  - Real-time monitoring, remote control of assets & improved efficiency
- **Advanced Analytics**
  - Predictive maintenance, improved yield, etc.
- **Certificate of Origin**
  - Monitoring will guarantee the origin for monetising green economy
  - End-to-end traceability

# Talent, Research and Innovation

- **Industry Relevant Skills Development**
  - Investment in infrastructure, curriculum, training, upskilling and reskilling
- **Research and Development**
  - Technology and Expertise
    - High Performance Computing facility
    - Network – scalable, low-latency network
    - Cloud computing
  - Research
    - AI (ML, LLM, etc), Industry 4.0, Cyber Security, etc
- **Innovation & Commercialisation**
  - Innovation ecosystem
  - Commercialisation

# Sarawak Artificial Intelligence Centre (SAIC)

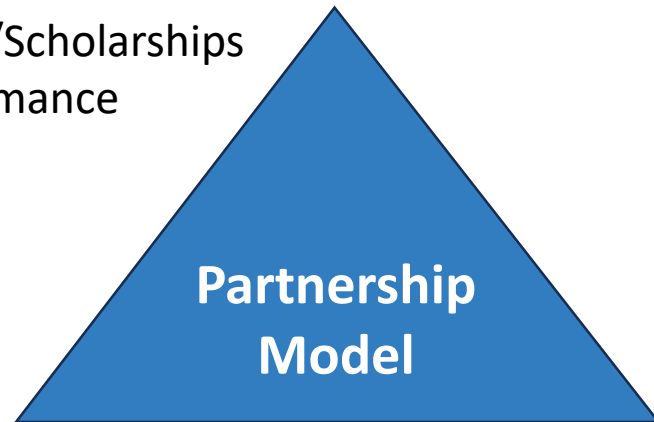

Advancing Responsible AI Systems that are Ethical, Trustworthy, Safe and Serve the Public Good

## FOCUS

- Research & Development
- Innovation, Technology Adoption & Ventures
- AI Governance
- AI Knowledge

## Sarawak Government

- Governance
- Funds/Scholarships
- Performance

## Technology Partners

- Technology & Expertise
- Infrastructure
- Funds/scholarships

## Universities

- Research
- Talent Development

# Cyber Security

## Cyber crime<sup>1</sup>

## Cyber attacks by sector in 2020<sup>2</sup>

## Security solutions

- Data encryption and online security solutions
- AI based security tools

## Protection of critical infrastructure

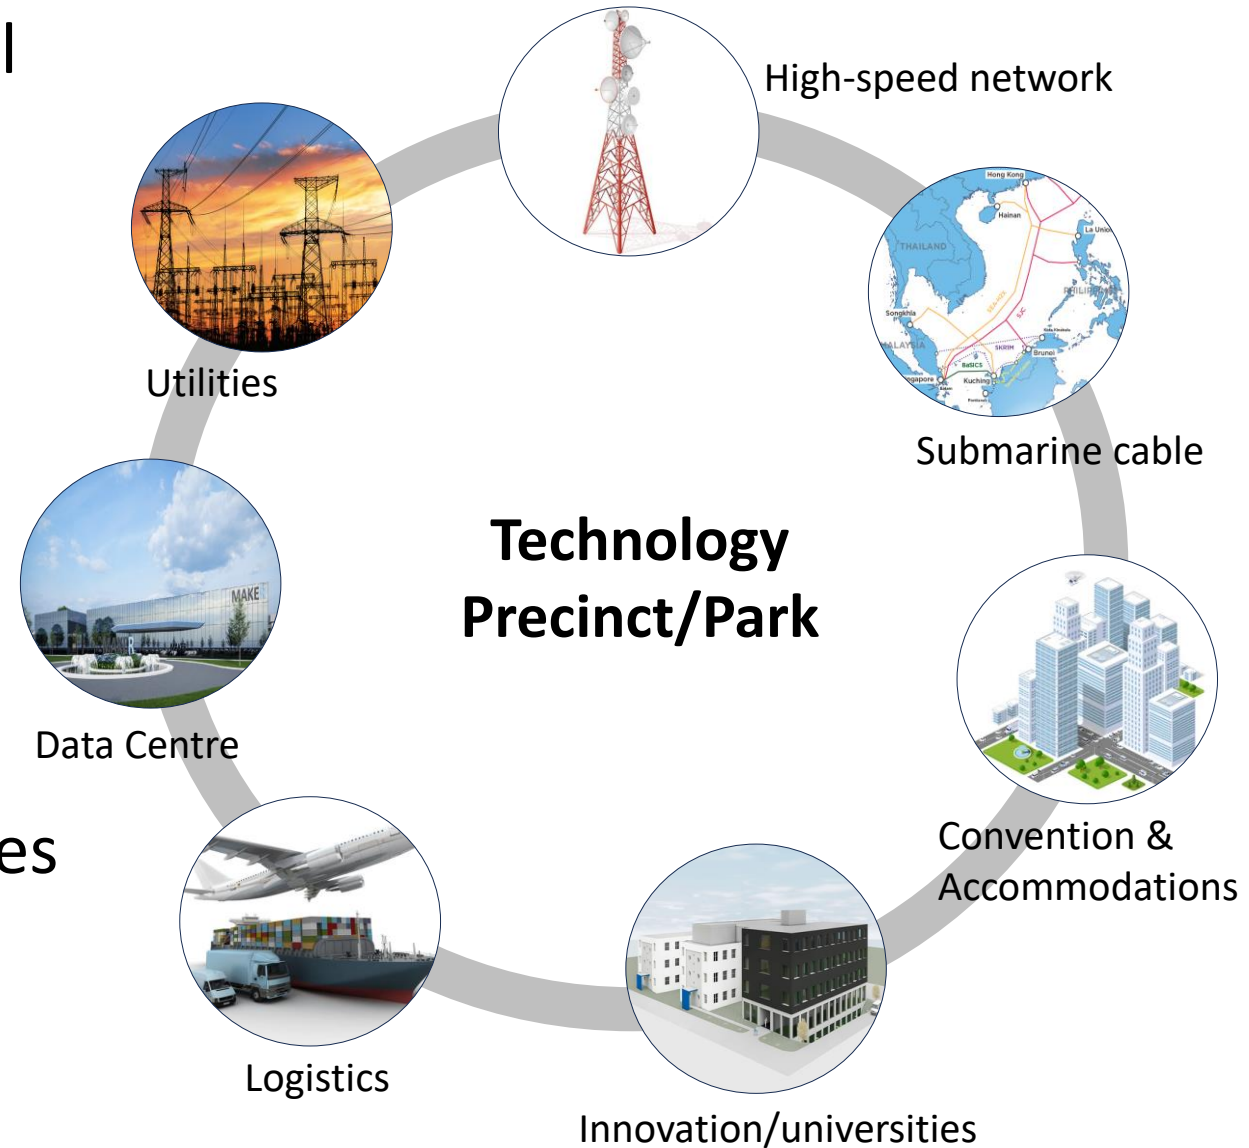

- Utilities: electricity, water, gas
- Healthcare
- Transport

## Talent development

- Cyber Security capabilities
- Research & Innovation

# Digital Precincts/Parks

- High-speed connectivity - local, national & global
- Data Centres
- Digital service industry
- Access to green energy and water
- Logistics - road, air & sea
- Universities/Innovation facilities
- Convention and accommodation facilities
- Good air quality
- Liveability and lifestyle

**SARAWAK  
DIGITAL ECONOMY  
BLUEPRINT  
2030**
